

Discover the coast of north-western Estonia!

Coastal hiking trail
The Baltic Coastal Hiking Route is part of the E9 long-distance hiking trail which stretches all the way from Portugal to Narva. In Lääne-Harju municipality the trail is divided into six one-day trips, covering Nõva-Vihterpalu, Vihterpalu-Padise, Padise-Paldiski, Paldiski-Kersalu, Kersalu-Laulasmaa, Laulasmaa-Vääna-Jõesuu but, of course, everyone can hike a distance that is suitable for them, whatever the length and location. Look out for white-blue-white markings and enjoy the hike.

Lighthouses
The tallest lighthouse in the Baltics is Pakri lighthouse, measuring 52m high, but there is also another working lighthouse in Lääne-Harju municipality. Surprisingly you can find it in the bell tower of St Matthias Church in Harju-Madise.

Waterfalls
Lääne-Harju municipality is rich in waterfalls. The Keila waterfall, the Treppoja waterfall, and the Türisalu cascades are well known even for visitors who come from farther away, but when the water levels are high the beauty of a waterfall can also be admired at Uuga, Pakri, Leetse, and the Kersalu cliffs on the coast.

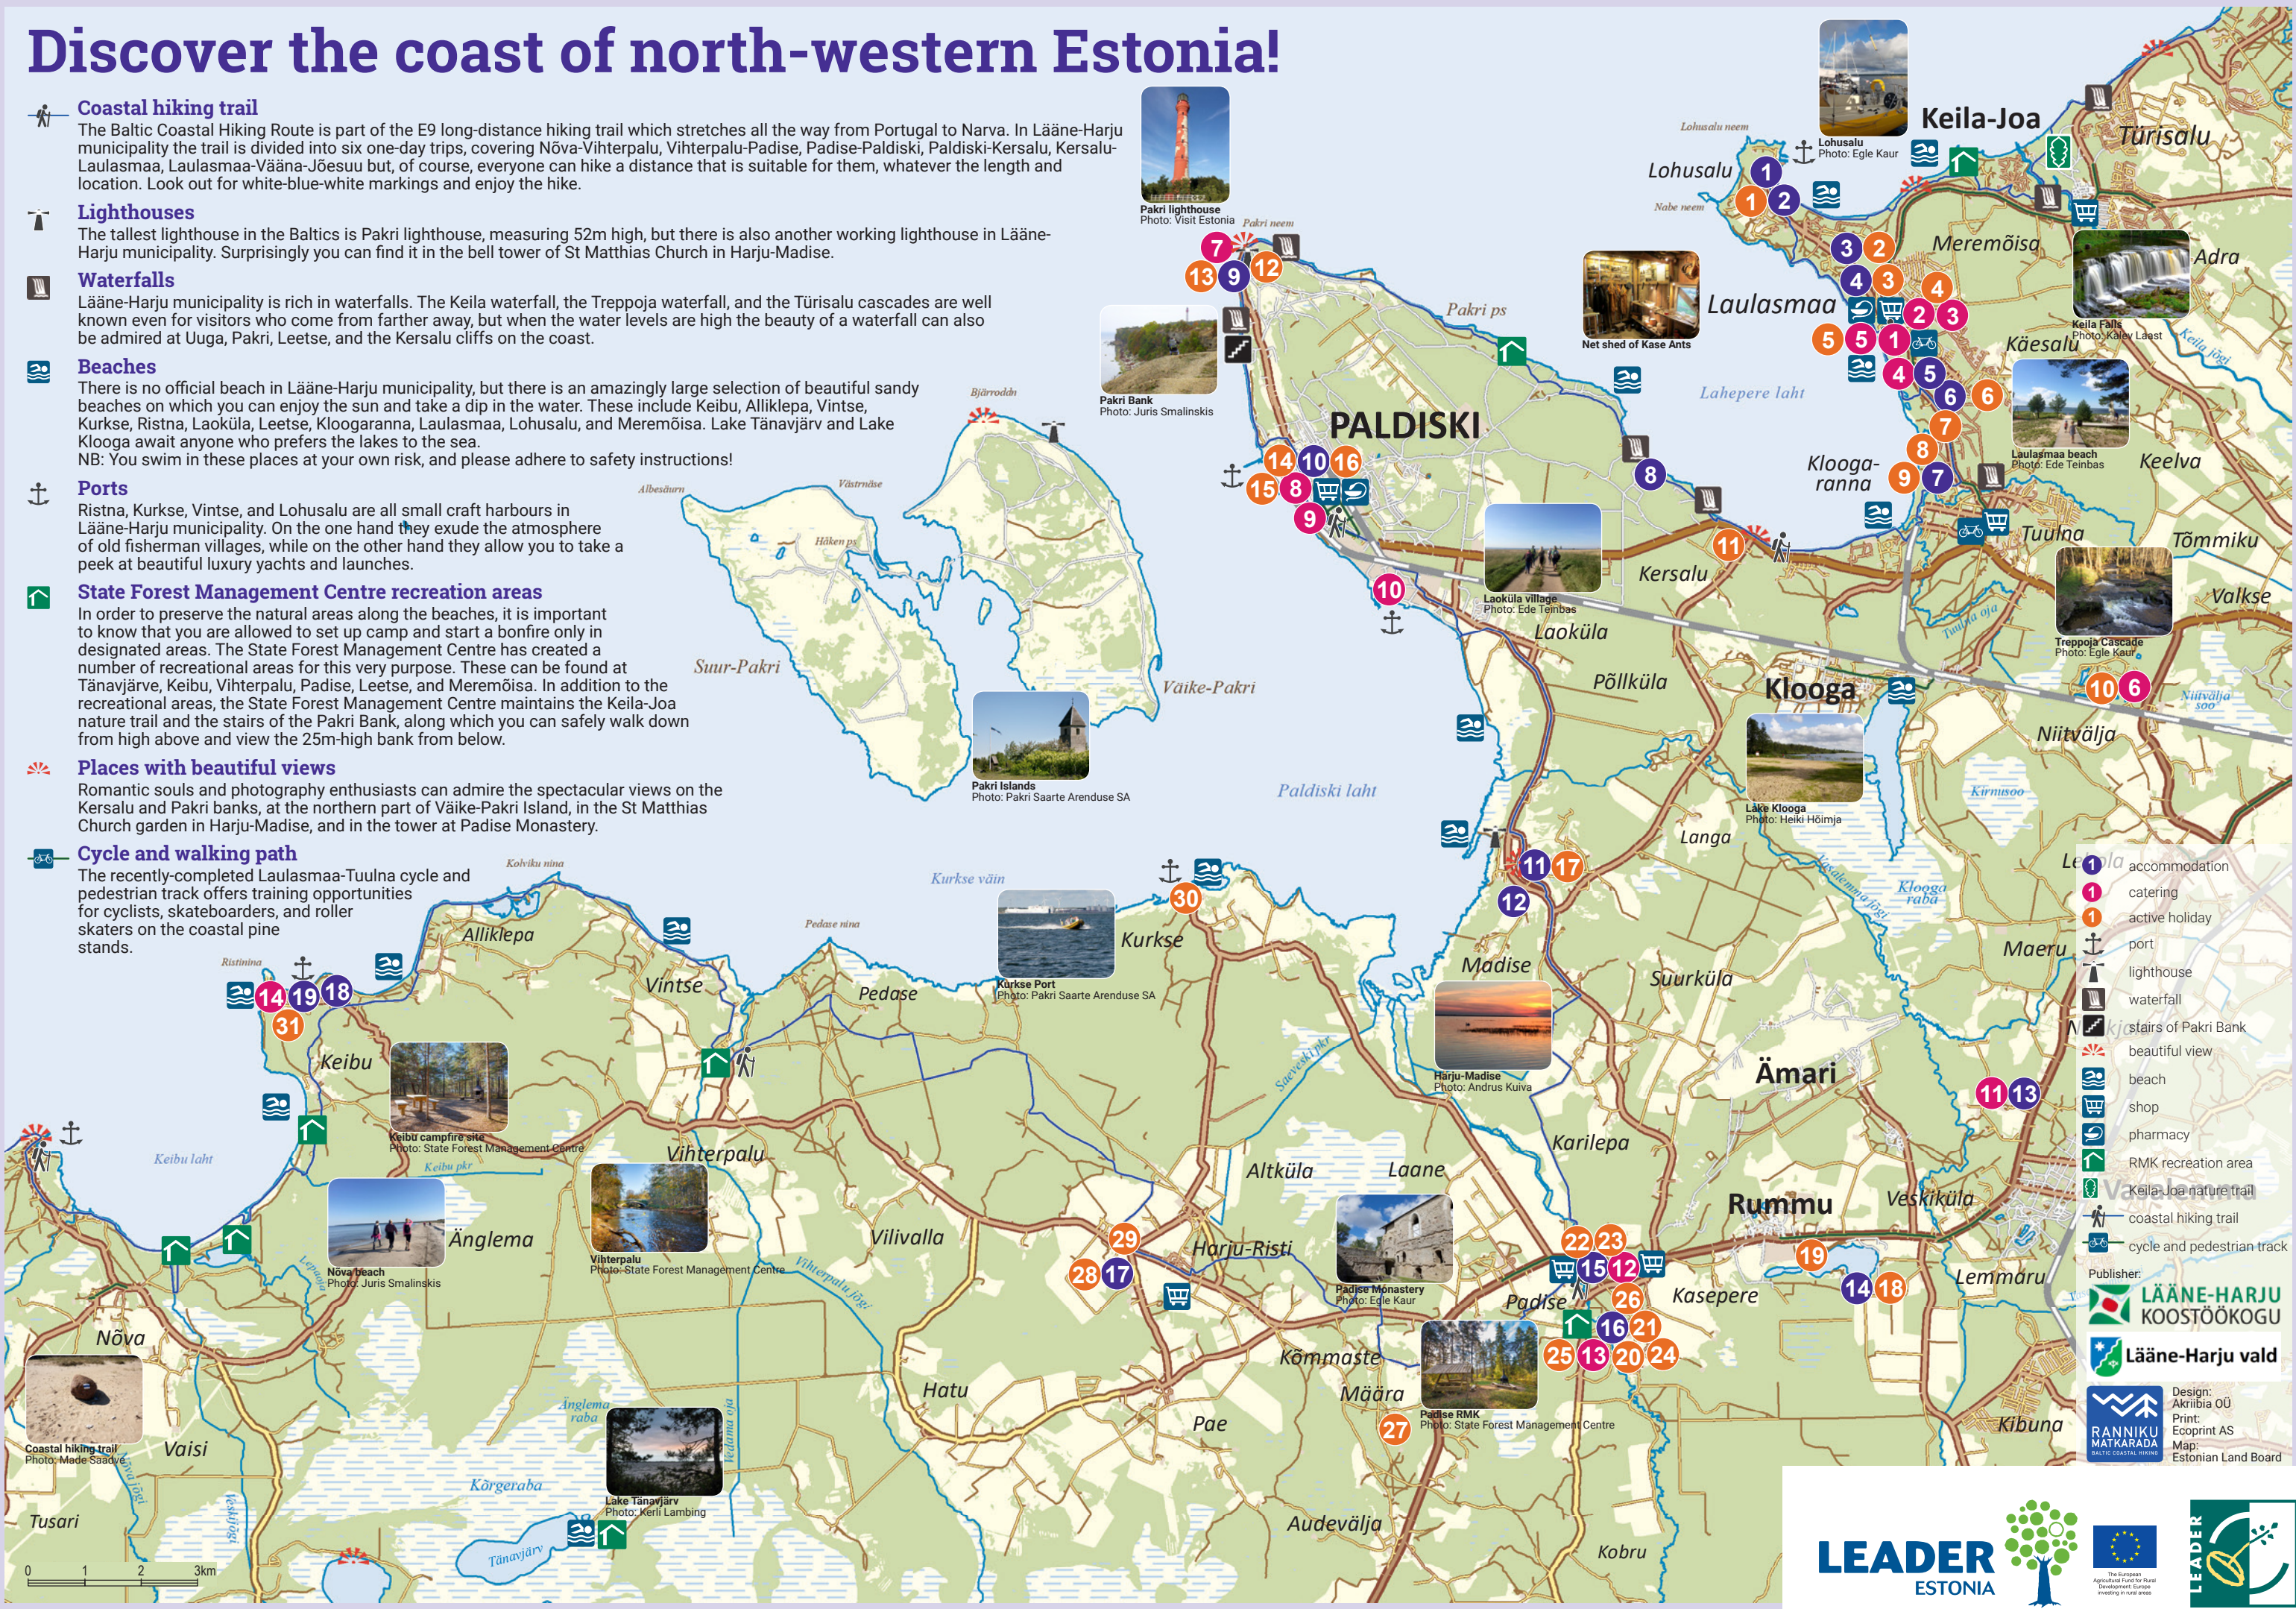

Beaches
There is no official beach in Lääne-Harju municipality, but there is an amazingly large selection of beautiful sandy beaches on which you can enjoy the sun and take a dip in the water. These include Keibu, Alliklepa, Vintse, Kurkse, Ristna, Laoküla, Leetse, Kloogaranna, Laulasmaa, Lohusalu, and Meremõisa. Lake Tānavjärvi and Lake Klooga await anyone who prefers the lakes to the sea.
NB: You swim in these places at your own risk, and please adhere to safety instructions!

Ports
Ristna, Kurkse, Vintse, and Lohusalu are all small craft harbours in Lääne-Harju municipality. On the one hand they exude the atmosphere of old fisherman villages, while on the other hand they allow you to take a peek at beautiful luxury yachts and launches.

State Forest Management Centre recreation areas
In order to preserve the natural areas along the beaches, it is important to know that you are allowed to set up camp and start a bonfire only in designated areas. The State Forest Management Centre has created a number of recreational areas for this very purpose. These can be found at Tānavjärve, Keibu, Vihterpalu, Padise, Leetse, and Meremõisa. In addition to the recreational areas, the State Forest Management Centre maintains the Keila-Joa nature trail and the stairs of the Pakri Bank, along which you can safely walk down from high above and view the 25m-high bank from below.

Places with beautiful views
Romantic souls and photography enthusiasts can admire the spectacular views on the Kersalu and Pakri banks, at the northern part of Väike-Pakri Island, in the St Matthias Church garden in Harju-Madise, and in the tower at Padise Monastery.

Cycle and walking path
The recently-completed Laulasmaa-Tuulna cycle and pedestrian track offers training opportunities for cyclists, skateboarders, and roller skaters on the coastal pine stands.
